

## Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## US Dollar Liquidity Fund - Qualified

ISIN: LU0904783114, Base Currency: USD

### A fund of Morgan Stanley Liquidity Funds

The fund is managed by MSIM Fund Management (Ireland) Limited, part of the Morgan Stanley group.

## OBJECTIVES AND INVESTMENT POLICY

### Objective

- To provide liquidity and an attractive rate of income relative to short term interest rates, to the extent consistent with the preservation of capital.

### Main Investments

- Short term money market securities, bank deposits and reverse repurchase agreements

### Investment Policy

- This is a Short-Term LVNAV Money Market Fund that will invest in high quality, short term (investments will have no more than 397 days or less until the amount is fully repaid) fixed and floating interest rate securities denominated in US Dollars. The fund may also enter into reverse repurchase agreements to buy securities from other financial institutions for cash with an associated agreement to resell them at a later date.
- The fund is actively managed and the management of the fund is not constrained by or compared to a benchmark.

### Other Information

- Income from the fund may be paid out to you in cash or additional shares.
- It is expected that the share price of the distributing share classes will remain at US \$1 through the distribution of dividends.

### Buying and selling shares

- Investors may buy and sell shares on any New York business day.

## RISK AND REWARD PROFILE

The risk and reward category shown is based on historic data.

- Historic figures are only a guide and may not be a reliable indicator of what may happen in the future.
- As such this category may change in the future.
- The higher the category, the greater the potential reward, but also the greater the risk of losing the investment. Category 1 does not indicate a risk free investment.
- The fund is in this category because it invests in money market securities and the fund's simulated and/or realised return has experienced low rises and falls historically.

This rating does not take into account other risk factors which should be considered before investing, these include:

- The value of bonds are likely to decrease if interest rates rise and vice versa.
- Issuers may not be able to repay their debts, if this happens the value of your investment will decrease. This risk is higher where the fund invests in a bond with a lower credit rating.
- The fund relies on other parties to fulfill certain services, investments or transactions. If these parties become insolvent, it may expose the fund to financial loss.
- While it is intended that the distributing share classes will maintain a share price of \$1, this may not be achieved due to the creditworthiness of the issuers of investments held or changes in interest rates.

## CHARGES

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

<b>Entry charge</b>	0.00%
<b>Exit charge</b>	0.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

<b>Ongoing charges</b>	0.21%
------------------------	-------

Charges taken from the fund under certain specific conditions

<b>Performance fee</b>	Not applicable
------------------------	----------------

The exit charge shown is a maximum figure. In some cases you might pay less, you can find this out from your financial adviser.

The ongoing charges figure is based on expenses for the year ending 31st December, 2020. This figure may vary from year to year. It excludes almost all costs of dealing in the fund's underlying investments.

The fund may charge a fee of up to 2.00% on redemptions if it feels other shareholders will suffer as a result of the cost of the transaction. This fee will be retained by the fund for the benefit of all shareholders.

For more information about charges, please see the General Charges and Expenses section of the prospectus.

## PAST PERFORMANCE

- Past performance is only a guide and does not guarantee future performance.
- Past performance has been calculated after the deduction of ongoing charges, as described above, but not the deduction of entry or exit charges.
- The fund was launched on 14 June 2013 following a transfer of assets from the equivalent fund of Morgan Stanley Funds p.l.c. This share class was re-launched in 2018.
- Past performance has been calculated in USD.
- The performance of the fund is not compared to a benchmark.
